

# Our Products

## CAPTIVE PORTALS

Splash pages are 100% customizable to support communication with your customers. There are several authentication methods available, including social login, paid access, vouchers, and REST API.

## RADIUS as a Service

Distributed RADIUS servers handle authentication and accounting requests. These servers support thousands of vendor attributes, CoA, data and time limits.

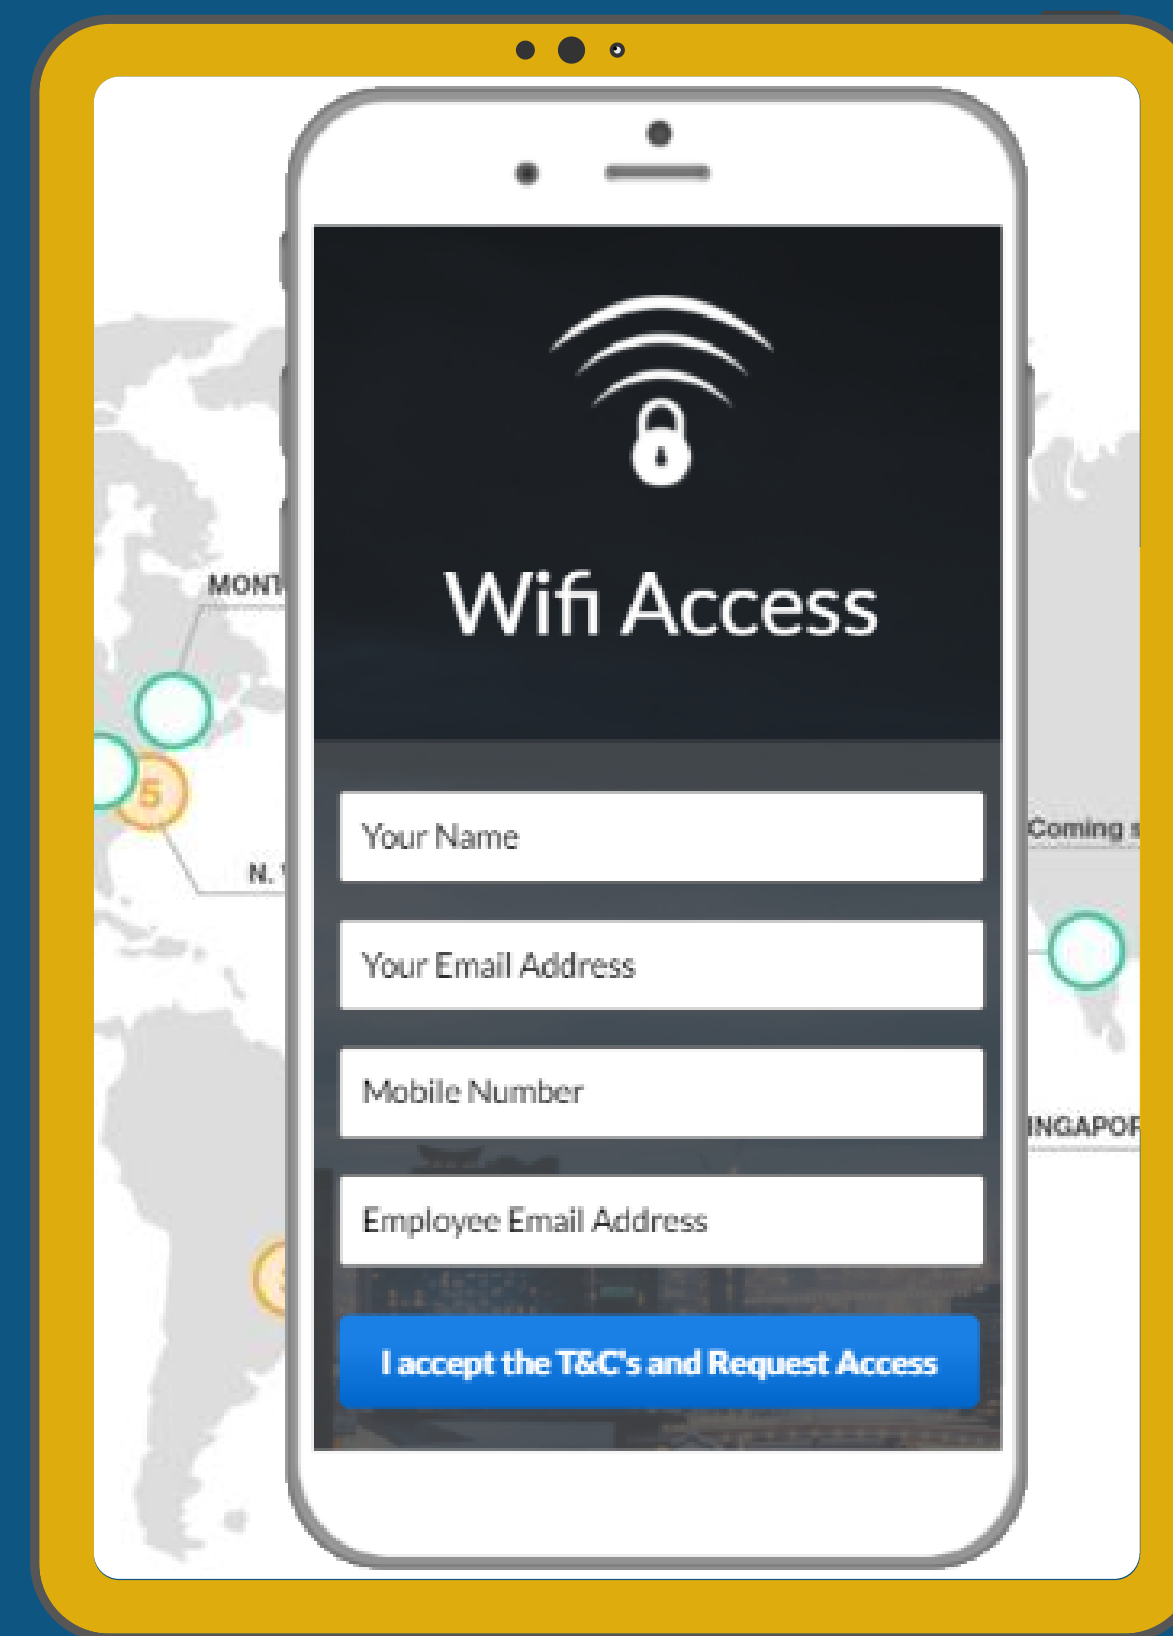

## OSU and SCEP

Online Signup Servers that are compatible with OpenRoaming and custom Identity Providers. Easy deployment of certificates through SCEP servers.

## Roaming and Offload

Offload mobile traffic to improve user experience and network coverage. Passpoint profiles from IronWiFi provide reliable and seamless authentication.
